Preface

Interstitial lung diseases; it is a group of diseases that affect the lung diffusely and show similar clinical, radiological and pathological features. Especially in recent years, as a result of the advances in diagnosis and treatment, its awareness has increased and progress has been made in treatment. Our aim in preparing this book is to guiding our colleagues working in the field of chest diseases in diagnosis and treatment, with current studies.

I would like to thank all my co-editor and writer colleagues, especially Associate Professor Berna AKINCI ÖZYÜREK, who always guided me with her experience and knowledge during the preparation of the book. We hope that this work will be useful to our colleagues

Sincerely,

Emire Pınar SEYFETTİN ÇELİK
