Preface

We believe that the light of science always illuminates all darkness and opens all doors. Recent advances show that pulmonary involvement in rheumatic diseases can have a chance for early diagnosis and treatment, primarily with the awareness of physicians and even patients. In our book, we aimed to shed light on all our colleagues in this field, especially in the branches of chest diseases and rheumatology.

Many thanks to our contributing authors and editors. We hope that this work will be useful to our colleagues

Sincerely,

Zeynep ERAYMAN ÖZEN
