Preface

Dear Colleagues,

Ophthalmology is a privileged and comprehensive field of medical science. It is a broad scientific field that contains basic physiological and optical mechanisms to advance imaging techniques, surgical methods, medical devices, and drugs in normal clinical practice. The purpose of the presenting book chapter is to present extensive ophthalmological guidelines from basic universal knowledge to highly scientific details about Strabismus, Neuro ophthalmological disorders and Management in the Geriatric Patient.

Our aim was to provide advanced information to our target group of ophthalmologists, specialized assistants, and other medical professionals such as neurologists.

We appreciate the outstanding colleagues who share their voluble knowledge and serve as chapter writers and the Medihealth Publishing House for their great efforts in this publishing process.

About MediHealth Academy and Thanks to

Dear Readers,

The MediHealth Academy is an Ankara-based independent publisher managed by academics of medical origin, with more than 20 years of academic background. The expert team collaborated with university lecturers and the academic community to produce book projects. The mission of the publisher is to lead journals containing high-scientific-value articles in the fields of medicine and health sciences to capture the diversity of regional and international articles and citations.

The main interest of MediHealth Academy Publishing is in scientific publications. Within the body of the MediHealth Academy, many books will both contribute to the scientific literature and guide the problems faced by experts in that field in daily practice, and book projects. The aim of the books and book chapters pioneered by the MediHealth Academy is to contribute to a high scientific value by preparing a subject in an area that lacks scientific knowledge.

We hope that this book series, which addresses ophthalmology in a certain age group and includes diseases and treatments of certain parts of the eye, will be useful to all readers. We will continue to support book projects that shed light on science.
