Preface

Dear Colleagues,

This book focuses on Eyelid Diseases and Management, which can only be seen in the pediatric age group and contains valuable information in this respect. In our comprehensive book, childhood eyelid disease and its management are explained in detail. Leading experts in the field wrote the chapters. It discusses the latest developments in epidemiology, pathogenesis, risk factors, classification, clinical diagnosis, and treatment of diseases. By means of concise text supported by a wealth of color illustrations, the authors' aim is to enable the reader to reach a fast and accurate diagnosis and ensure early treatment, which may ultimately prevent the occurrence of further disease. Book: This has been prepared as an ideal book for ophthalmologists, pediatricians, and those working in these fields. We hope that this book will be a good resource and of great benefit.

About MediHealth Academy and Thanks to

Dear Readers,

The MediHealth Academy is an Ankara-based independent publisher managed by academics of medical origin, with more than 20 years of academic background. The expert team collaborated with university lecturers and the academic community to produce book projects. The mission of the publisher is to lead journals containing high-scientific-value articles in the fields of medicine and health sciences to capture the diversity of regional and international articles and citations.

The main interest of MediHealth Academy Publishing is in scientific publications. Within the body of the MediHealth Academy, many books will both contribute to the scientific literature and guide the problems faced by experts in that field in daily practice, and book projects. The aim of the books and book chapters pioneered by the MediHealth Academy is to contribute to a high scientific value by preparing a subject in an area that lacks scientific knowledge.

We hope that this book series, which addresses ophthalmology in a certain age group and includes diseases and treatments of certain parts of the eye, will be useful to all readers. We will continue to support book projects that shed light on science.
