Preface

Dear Colleagues,

I am excited and proud to present this book, which addresses important topics in the field of ophthalmology. Titled "Refractive Errors, Conjunctival and Scleral Diseases and Management in the Pediatric Population," this work aims to comprehensively examine and manage refractive errors, conjunctival, and scleral diseases in the pediatric population.

Eye health is particularly crucial during childhood, and early diagnosis and effective management of various eye diseases can positively affect lifelong visual health. This book focuses on refractive errors, as well as diseases of the conjunctiva and sclera, providing current information for specialists in pediatric ophthalmology and eye health.

The content of the book was shaped by expertise in the field and authored by experienced professionals. Each chapter offers readers a comprehensive overview, allowing them to delve into the depth of the subject matter and understand contemporary treatment strategies.

We hope that this book will serve as a valuable resource with significant benefits. We believe that it will be an invaluable resource for ophthalmologists, pediatricians, and other healthcare professionals working in this field.

I would like to extend my sincere thanks to all the authors who have contributed chapters to this book and have shared their knowledge with the academic community through the publisher. My heartfelt gratitude goes to the publisher's management, editors, and staff for providing us with the opportunity to publish this work.

Sincerely,

Editor
Assist. Prof. Şerife Gülhan KONUK

About MediHealth Academy and Thanks to

Dear Readers,

The MediHealth Academy is an Ankara-based independent publisher managed by academics of medical origin, with more than 20 years of academic background. The expert team collaborated with university lecturers and the academic community to produce book projects. The mission of the publisher is to lead journals containing high-scientific-value articles in the fields of medicine and health sciences to capture the diversity of regional and international articles and citations.

The main interest of MediHealth Academy Publishing is in scientific publications. Within the body of the MediHealth Academy, many books will both contribute to the scientific literature and guide the problems faced by experts in that field in daily practice, and book projects. The aim of the books and book chapters pioneered by the MediHealth Academy is to contribute to a high scientific value by preparing a subject in an area that lacks scientific knowledge.

We hope that this book series, which addresses ophthalmology in a certain age group and includes diseases and treatments of certain parts of the eye, will be useful to all readers. We will continue to support book projects that shed light on science.
