Preface

Dear Colleagues and Readers,

Today, owing to technological developments, as well as increasing clinical studies, observations, and professional information sharing, very fast and great advances are being made in modern medicine. In addition, it facilitates access to information on platforms, such as meetings, congresses, and social media. Both in eye diseases as a branch and in all sciences, our current information is being updated, and some of it is changing.

During this period, when information spreads and changes rapidly, with the encouragement of Prof. Mehmet ÇITIRIK, we prepared a book titled 'Lacrimal System, Orbital Diseases, Ocular Tumors, and Management in the Pediatric Population' where current information is shared.

Considering the current developments in the literature, we aimed to facilitate approaches to the Lacrimal System, Orbital Diseases, Ocular Tumors, and Management in the Pediatric Population.

In ophthalmology departments where examinations and treatments are carried out, I believe this book will be very useful.

I would like to thank all our authors, teachers, and everyone who contributed to the emergence of this work for their support.

Sincerely...

Editor

About MediHealth Academy and Thanks to

Dear Readers,

The MediHealth Academy is an Ankara-based independent publisher managed by academics of medical origin, with more than 20 years of academic background. The expert team collaborated with university lecturers and the academic community to produce book projects. The mission of the publisher is to lead journals containing high-scientific-value articles in the fields of medicine and health sciences to capture the diversity of regional and international articles and citations.

The main interest of MediHealth Academy Publishing is in scientific publications. Within the body of the MediHealth Academy, many books will both contribute to the scientific literature and guide the problems faced by experts in that field in daily practice, and book projects. The aim of the books and book chapters pioneered by the MediHealth Academy is to contribute to a high scientific value by preparing a subject in an area that lacks scientific knowledge.

We hope that this book series, which addresses ophthalmology in a certain age group and includes diseases and treatments of certain parts of the eye, will be useful to all readers. We will continue to support book projects that shed light on science.
