Preface

Dear Colleagues,

I am pleased to have written the preface of this book. This book reflects the authors' dedication to research and scientific publications throughout their intense work plan.

This book was written to provide the best information in a short period of time. Readers will understand new scientific studies, developments, and accumulated knowledge that have been conducted over the years along with the authors' own elaborate observations, publications, and analyses.

In this work, we will easily obtain the necessary information and details that provide a differential diagnosis in a pill-like summary.

As a result, this book will become an important work that will be a reference source for ophthalmologists and ophthalmology residents who are just starting their training.

Kind Regards

Editor

About MediHealth Academy and Thanks to

Dear Readers,

The MediHealth Academy is an Ankara-based independent publisher managed by academics of medical origin, with more than 20 years of academic background. The expert team collaborated with university lecturers and the academic community to produce book projects. The mission of the publisher is to lead journals containing high-scientific-value articles in the fields of medicine and health sciences to capture the diversity of regional and international articles and citations.

The main interest of MediHealth Academy Publishing is in scientific publications. Within the body of the MediHealth Academy, many books will both contribute to the scientific literature and guide the problems faced by experts in that field in daily practice, and book projects. The aim of the books and book chapters pioneered by the MediHealth Academy is to contribute to a high scientific value by preparing a subject in an area that lacks scientific knowledge.

We hope that this book series, which addresses ophthalmology in a certain age group and includes diseases and treatments of certain parts of the eye, will be useful to all readers. We will continue to support book projects that shed light on science.
