Preface

Dear Colleagues,

Ophthalmology is a rapidly developing field in the 21st century, with new diagnostic and treatment options and the use of advanced technologies. Glaucoma, the second most common cause of preventable blindness that can lead to irreversible visual loss, has benefited from these advancements.

We are proud to present our book, *Glaucoma and Management in the Geriatric Population*, to our colleagues, particularly resident ophthalmologists. This book contains basic knowledge, practices, and up-to-date information. In this rapidly evolving field, it is important to stay abreast of the latest knowledge and techniques.

This comprehensive book was prepared by young ophthalmologists, who are experts in their field, based on the most up-to-date information and literature. I thank them for their labor and effort. I also express my sincere gratitude to the managers, editors, and staff of the publishing house for their support during the writing process. Finally, I express my gratitude to the esteemed ophthalmologist, Prof. Mehmet Çıtırık, for his valuable contribution and support.

We hope that this book will be useful to our colleagues.

About MediHealth Academy and Thanks to

Dear Readers,

The MediHealth Academy is an Ankara-based independent publisher managed by academics of medical origin, with more than 20 years of academic background. The expert team collaborated with university lecturers and the academic community to produce book projects. The mission of the publisher is to lead journals containing high-scientific-value articles in the fields of medicine and health sciences to capture the diversity of regional and international articles and citations.

The main interest of MediHealth Academy Publishing is in scientific publications. Within the body of the MediHealth Academy, many books will both contribute to the scientific literature and guide the problems faced by experts in that field in daily practice, and book projects. The aim of the books and book chapters pioneered by the MediHealth Academy is to contribute to a high scientific value by preparing a subject in an area that lacks scientific knowledge.

We hope that this book series, which addresses ophthalmology in a certain age group and includes diseases and treatments of certain parts of the eye, will be useful to all readers. We will continue to support book projects that shed light on science.
